DEVELOPER EXPERIENCE

Cryptofunk

Front-End Software Engineer (February 2022-present)

- With this start up NFT company, I am building an aesthetic NFT commerce website, offering 10,000 unique NFTs to customer base
- Created wireframe and building out front end with Next JS, typescript, and tailwind CSS

Distribrewtion

Software Engineering Intern (June 2021-November 2021)

- Aided in key front-end/back-end updates to our flagship SaaS product providing craft breweries with a new and improved method of keg tracking and inventory management to over 60 craft brewery owners

PROJECTS

Best Coffee Co.| Github Code Demo | App Demo

A coffee lover's inspired e-commerce website, built to provide the user with a seamless experience of viewing and purchasing this pseudo company's offerings

- Built application end to end including planning and wire framing of the front end with React, redux, and google user authentication through firebase auth
- Created a responsive and aesthetic experience for the user with tailwind css

Adventure Times Blog| Github Code Demo | App Demo

A full stack web based application built with that enabled users to experience an aesthetic and responsive blog experience, with access to posts, and the functionality to add comments

- Built application end to end including planning and wire framing of the front end with Next JS & the backend with Sanity CMS, built with typescript to ensure a robust and secure code base
- Created a responsive and aesthetic experience of the Adventure times UI with tailwind CSS

Life Rx| Github Code Demo | App Demo

A lifestyle optimization focused full-stack web based application that enabled users to most efficiently manage their productivity, fitness, and mental aspects of their life

- Designed and developed a front-end, responsive and scalable lifestyle optimization focused web app using React, MySQL, Express, and Node.js with a unique front end designed with JavaScript, Bootstrap and CSS to ensure a seamless and engaging user experience.
- Integrated express backend API and deployed the web application on the cloud with netlify

WORK EXPERIENCE

The Infinite Human Blueprint Custom Personal Training

Founder & Head Fitness Coach (2015-present)

- Helping 100s of clients reach transformational results through personalized fitness program design and 1 on 1 guidance through the process
- Created an engaged social following by building relationships through high touch interactions on social media, and by offering transformational value through the content shared
